omerkor.vercel.app

Frontend Developer with 6+ years of experience building scalable, UX-focused, and high-performance web applications with React, Next.js, TypeScript, and modern JavaScript. Experienced in modernizing legacy projects, improving performance, and developing scalable frontend solutions for enterprise brands including Arçelik, Beko, Fiat, Jeep, and leading hospitality companies.

### SUMMARY

**Frontend:** React, Next.js, HTML5, CSS3

**Languages:** JavaScript, TypeScript

**Styling:** Tailwind CSS, Shadcn/UI, Ulkit

**Forms & Validation:** React Hook Form, Zod

**State Management:** React Context API

**CMS:** Sanity CMS

**Animation:** Framer Motion

**Tools:** Git, GitHub, Vercel, Figma

### SKILLS

#### Frontend Developer & Product Consultant | Freelance - Remote / İzmir (May 2025 - Present)

- Worked directly with clients to gather requirements, shape product ideas, and deliver modern web solutions from concept to deployment.
- Developed high-performance web applications using Next.js, Tailwind CSS, and Sanity CMS, transforming business requirements into scalable, user-focused products.

#### Frontend Developer | Clockwork Agency - Remote / Istanbul (Dec 2022 - May 2025)

- Served as a sub-lead for a team of 4–5 frontend developers, providing technical guidance, assigning tasks, and resolving complex development blockers.
- Built responsive and pixel-perfect user interfaces using Ulkit and Tailwind CSS from Figma designs, collaborating closely with backend developers for seamless Umbraco CMS integration.
- Modernized and maintained enterprise React applications by developing new features, refactoring legacy code, and resolving production issues.

#### Frontend Developer | Anibal Technology - Remote / Kocaeli (Jul 2022 - Dec 2022)

- Served as the sole Frontend Developer, building a comprehensive e-commerce marketplace application from scratch using React, Tailwind CSS, and Zod.
- Designed UI layouts in Figma for supplementary projects and translated them into functional HTML/JS/Tailwind templates for backend delivery.

#### Frontend Developer | Egegen Agency - İzmir (May 2021 - Aug 2022)

- Executed fast-paced PSD-to-HTML conversions utilizing Bootstrap, HTML, CSS, and JS for seamless integration with PHP CodeIgniter backends.
- Provided active post-launch support across numerous web projects, handling additional client requests, feature enhancements, and bug fixes.

#### Software Developer | Renk Technology - İzmir (Jul 2020 - Mar 2021)

- Developed diverse web solutions utilizing a wide stack including C#, JS, jQuery, AJAX, and Bootstrap, adapting rapidly to diverse client requirements.
- Built custom SharePoint panels, low-code forms using Microsoft Power Apps and Power Automate.

#### Data Analyst & Co-Lead | Arima Research - İzmir (2019 - 2020)

- Co-led a 10-member analyst team supporting a nationwide field operation of over 1,200 personnel.
- Built statistical models achieving election predictions within a 1% margin of error.

### WORK EXPERIENCES

#### Afyon Kocatepe University

B.Sc. in **Statistics**

Afyonkarahisar, Turkey 📅 2011 – 2016

### EDUCATION

**Turkish** – Native

**English** – B1 (Working proficiency)

**German** – Beginner

### LANGUAGES

### Arçelik Global & Beko Corporate

- Tech Stack: Native JS (ES6+), HTML5, CSS3, UIKit
- Executed comprehensive refactoring and bug-fixing by updating existing system libraries.
- Implemented structural improvements to increase overall site speed by 40% and modernized UI components.

### Fiat & Jeep

- Tech Stack: React, Redux, Tailwind CSS
- Developed new features, dynamic components, and complex form structures within enterprise React applications used by global automotive brands.
- Resolved 20+ production issues, improved application stability, and maintained existing React architecture.

### Regnum Carya & Akra Hotels

- Tech Stack: Native JS (ES6+), UIKit, HTML5, CSS3
- Built the frontend architecture from scratch for luxury hotel websites and full-fledged reservation systems.
- Applied advanced image and page speed optimizations to ensure peak performance despite high-resolution media.

### Modern Web Projects (Personal & Freelance)

- Tech Stack: Next.js, Tailwind CSS, Shadcn/UI, Framer Motion, Sanity CMS
- Developed high-performance web projects from scratch for local businesses and my personal portfolio.
- Integrated Headless CMS (Sanity) for content management and crafted fluid UI animations using Framer Motion.
